

# Step 1: Rebate Reallocation Permissibility

## Step 2A: Targeting Part D Basic Premium

## Step 2B: Targeting LIPSA

Are you updating Part D basic premium through rebate reallocation to one of the following (i.e. Target LIPSA)?

- 1) exact LIPSA amount
- 2) LIPSA rounded up or down to \$0.10
- 3) LIPSA rounded down to nearest \$1
- 4) < LIPSA and (i) rebates allocated to Part D basic premium or (ii) all other rebate allocations are equal to the maximum value (maximum values found in MA WS6 Section III.B)
- 5) > LIPSA and total MA rebate allocated to Part D basic premium

No

Not participating in rebate reallocation.  
Total Plan Premium = Part D Basic Premium Post Benchmark Release + Original Part D Supplemental Premium + Original MA Premium  
Go to Step 3: Premium Rounding

Yes

Are you increasing/adding or reducing/removing benefits to reallocate rebates?

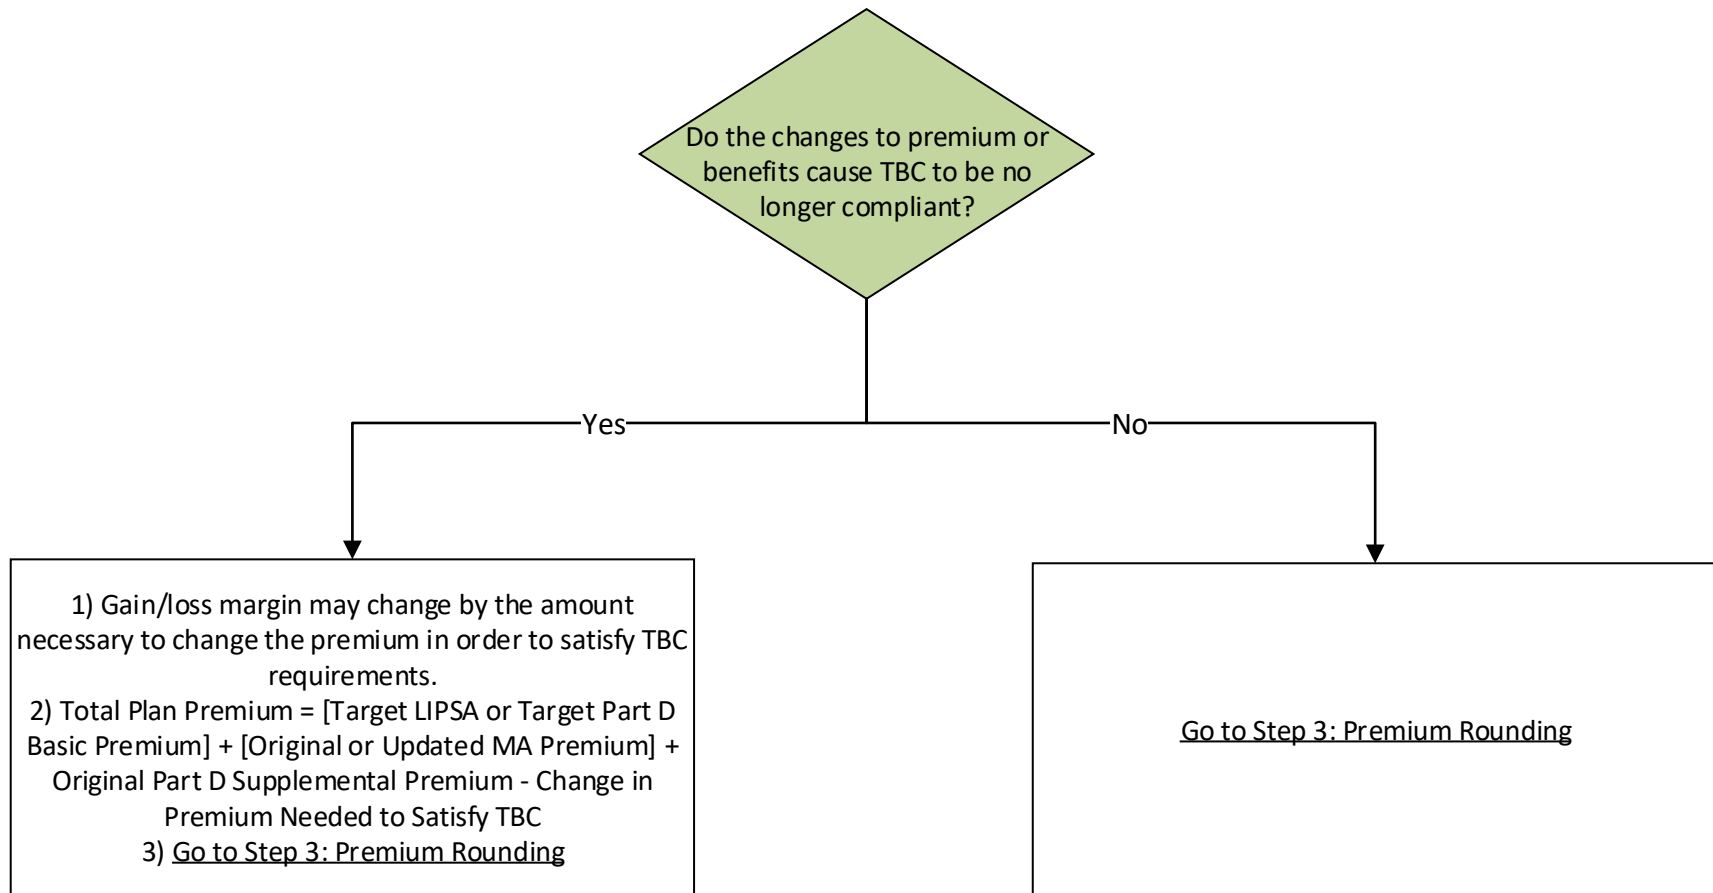

Yes

No

- 1) It is preferable to allocate excessive rebates after Part D benchmark release to the maximum values for reducing A/B cost sharing and other A/B MSB rebate allocations (maximum values found in MA WS6 II.C) before making any changes to benefits.
- 2) When increasing (for excessive unallocated rebates) or reducing (for insufficient unallocated rebates) benefits for rebate reallocation, you may get back to initial MSB premium (rounded to nearest \$0.10).
- 3) Total Plan Premium = Target LIPSA + [Original or Updated MA Premium] + Original Part D Supplemental Premium
- 4) Go to Step 2C: TBC Check

Total Plan Premium = Target LIPSA + Original MA Premium + Original Part D Supplemental Premium - Change in Rebates Allocated to Part D Basic Premium  
Go to Step 2C: TBC Check

## Step 2C: TBC Check

## Step 3: Premium Rounding
